

# URGENT NOTICE - Secret Aussie Supplement Ban Legislation Imminent- CODEX Looming

## **Eve Hillary Health Freedom CODEX Campaign URGENT NOTICE**

### **PLEASE HELP STOP:**

Secret anti Health Supplement Legislation Being Passed in Aussie Parliament

Natural Health Supplements ARE in the Firing Line ~ Australia IS in CODEX

Without public knowledge or debate the Australian Government has initiated steps to force the natural health industry under the control of multi-national drug corporations. Australians and New Zealanders will lose the right to choose Natural health care if the Australian Government's secret legislation is not stopped.

Since Pan Pharmaceuticals was gutted by the TGA in 2003, the regulator has installed drug corporations on committees that have generated volumes of new laws that have sent the Australian supplement industry to the wall, making the markets ready to be taken over by drug companies.

### **What are the FACTS?**

The war on supplements is nothing but a trade war. Supplements are hurting drug companies. They want their share of the action. Drug companies have lobbied the Australian government to bring about massive secret changes to Australia's health care structure. Here's what they've done:

The Australian Government has signed an international treaty (known as the JTA Treaty) in 2003 which forms the basis for a massive new international regulating "agency". This is due to come into effect July 1, 2005. unless the voters stop implementing legislation from being passed by Parliament. This new regulating agency, called the Trans Tasman Agency is structurally nothing more than an off shore corporation partnered by the TGA and multi national drug corporations. That means multi-national drug companies will "regulate" all vitamins and supplements. The new 'offshore' agency will operate directly within the international jurisdiction of CODEX. Australian Health Care will have been taken over by trans-national corporations unless Australians and New Zealanders stop these laws about to be implemented. VOTERS CAN STOP THEM - IF THEY ACT NOW

**IMPORTANT PUBLIC MEETINGS!**

**VITAMINS AND MINERALS IN THE FIRING LINE**

A series of public meetings & workshops will be given by Internationally acclaimed author of "Children of a Toxic Harvest" and "Health Betrayal: staying away from the sickness industry" Eve Hillary.

The purpose of these meetings is to spread awareness and initiate a campaign against the coming provision of the Codex Alimentarius, which threatens to make vitamins and other natural therapies unavailable or extremely expensive for the public.

Eve Hillary states; "Without public knowledge or debate the Australian Government has initiated steps to force the natural health industry under the control of drug industries so international Codex regulations can apply." Health campaigners fear UN/WHO Codex recommendations include a ban on supplements for preventative or therapeutic use, and that the Recommended Daily Allowance (RDA), the standard used presently in assessing vitamin and mineral intake, will be used as a way of restricting how much of any essential nutrient a person can take.

Fears for price rises in nutritional supplements may make them expensive. Norway and Germany are already operating under the new Codex regulations. The price of zinc tablets has been reported to have gone from \$4 to \$52 whereas Echinacea has risen from \$14 to \$153. Campaigners in Australia fear this means that nutritional supplements will be beyond the reach of all but a few.

Eve Hillary will reveal the biggest betrayal and threat to health freedom in Australian history and what all citizens can do about it before July 2005 when the regulation of Australia's supplements is scheduled be placed into the hands of the drug industry and outside the control of Australians and their Parliament.
